Internship Program

Want to spend some time in the European labs of a world class industrial research organization?

Xerox research is looking for outstanding students in computer science, computational linguistics, computer vision, machine learning and ethnography.

Our internship program has been designed to bring highly qualified and motivated students with diverse backgrounds together and to provide them with an opportunity to improve their analytical, technical and professional skills as well as the experience to work in a truly international environment.

Our interns have the chance to make an impact through the teams they join, the projects they work on and the leaders who mentor them. The Xerox Research Centre Europe runs a appreciated and structured internship program, offers exceptional experiences, mingling nationalities, cultures, languages and academic fields.

Xerox is the world leader in document management and business process outsourcing. Research in Europe ensures that Xerox maintains that position.

Xerox Research Centre Europe (XRCE) is the European branch of Xerox’s Innovation Group which has a worldwide footprint with labs in the USA, Canada, India and Europe. The centre is set in the heart of the French Alps near Grenoble.

Xerox research is associated with many of the concepts that define much of today’s working environments: the personal computer, the graphical computer interface, the mouse-driven computer interface, the laptop, digital laser printing, word processing, the Ethernet and ubiquitous computing to name but a few.

The Centre is a multidisciplinary and extremely multicultural organization specializing in service analytics, work practice technologies, machine learning, computer vision, natural language processing, data mining and software architectures and frameworks. It creates innovative services and solutions for a number of industries.

The centre collaborates with many partners in the European scientific community on a number of R&D projects.

Location: XRCE is located in the south east of France in Grenoble.

The notoriety of Grenoble comes from its exceptional natural environment and scientific reputation with 21,000 jobs in public and private research. Grenoble has the highest concentration of research jobs in France. It has a large student community (over 65,000 students) and with 15% of foreign students it has France’s largest international student population. Grenoble is a lively and cosmopolitan place, offering a host of leisure opportunities. Grenoble is close to both the Swiss and Italian borders and is the ideal place for skiing, hiking, climbing, hang gliding and all types of mountain sports.

Eligibility: Students should have at least four years in higher education in the relevant field.

All applicants must be registered students at a university or other academic institution. An internship agreement is signed between Xerox and the student’s institution.

Xerox is an equal opportunity employer.
