

# Xerox Research Centre Europe Internship Programme

Xerox is a company that is founded on and thrives on innovation.

Xerox innovation brings together many disciplines and technical competencies. Xerox is unique in this respect in that its research has spanned everything from basic physical sciences, mechanical and electrical engineering through to social science and psychology.

**The Xerox Research Centre Europe** is part of the global Xerox Innovation Group made up of 800 researchers and engineers in four world-renowned research and technology centres.

**XRCE is a young, dynamic multicultural and multidisciplinary research organization, in Grenoble, France.** We have renowned expertise in natural language processing, work practice studies, image-based document processing, distributed applications and knowledge management agents.

Students should have at least four years in higher education in computing science, artificial intelligence, applied mathematics, statistics, marketing or business administration.

Xerox is an equal opportunity employer.

**Internship projects in Europe are advertised at:**

The notoriety of Grenoble relies on its exceptional natural environment and the wealth of the urban and cultural regional life. Stimulated by the presence of a large student community, Grenoble has become a resolutely modern city with a vibrant cultural scene. It is a lively and cosmopolitan place, offering a host of leisure opportunities. Grenoble is close to both the Swiss and Italian borders and is the ideal place for skiing, trekking, climbing, hang-gliding and all types of mountain sports.
